

GE LogiqP5 LogiqP6 LogiqS6 Endocavity Array Original Ultrasound Probe E8CS

Our Product Introduction

for more products please visit us on 3dultrasoundprobe.com

Basic Information

- Place of Origin: USA
- Brand Name: GE
- Model Number: E8CS
- Minimum Order Quantity: 1pc
- Price: negotiable
- Packaging Details: carton
- Delivery Time: 3-5 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10-30pcs/month

Product Specification

- Warranty: 60 Days
- Lead Time: 3-5 Days
- Service: Outright
- Shipping Method: Express, or As Clients Required
- Highlight: GE Logiq P6 Ultrasound Probe,
GE Logiq P5 Ultrasound Probe,
E8CS Ultrasound Probe

Product Description

GE LogiqP5 LogiqP6 LogiqS6 Endocavity Array Original Ultrasound Probe E8CS

Product Attributes

Attribute	Value
Warranty	60 days
Lead time	3-5 days
Service	Outright
Shipping method	Express, or as clients required

Product Description

GE LogiqP5 LogiqP6 LogiqS6 endocavity array original ultrasound probe E8CS

Model: E8CS

Application: Obstetrics, Gynaecology, Urology

Type: transvaginal array

Frequency: 4.0-11.0 Mhz

Compatible system: GE Logiq P3; GE Logiq P5; GE Logiq P5 Premium; GE Logiq P6 Pro; GE Logiq P6; GE Logiq S6

More details welcome to contact with us!

Technical Specifications

Product Name	Ultrasound Probe/Ultrasound Transducer
Probe Model	GE E8CS
Probe Type	transvaginal array TVS
Central Frequency	3.0-11.0MHz
Compatible system	GE Logiq P3; GE Logiq P5; GE Logiq P5 Premium; GE Logiq P6 Pro; GE Logiq P6; GE Logiq S6
Warranty	60 days

Delivery date	Within 1 week after getting payment
MOQ	1 Unit
Condition	original
Material	Metal and Plastic
Application	Obstetrics, Gynaecology, Urology
Service	Used/new original sell

System Overview

The GE Logiq P6 ultrasound system provides a combination of performance, ergonomics and value to help meet a broad range of applications--including vascular, abdominal, small parts, OB/GYN and cardiac. It is a midrange ultrasound machine that looks similar to the lower priced Logiq P5 but adds many high-end features.

The GE Logiq P6 features a 17 inch LCD display mounted on an articulated arm allowing the user to share the images with the patient in real time. The Logiq P6 also features all the necessary keys located around a trackball for convenience and ease when switching modes.

The Logiq P6 system comes equipped with Speckle Reduction Imaging, CrossXBeam imaging, Tissue Harmonics and 3D/4D imaging. With the Logiq P6's ergonomic size, three transducer ports the GE Logiq P6 can easily be moved from room to room. And, with it's ability to produce images for many different ultrasound applications, it is easily transported from department to department.

This system, as part of the GE Logiq family, specializes in general imaging and radiology, and is capable of producing ultrasound images for applications including but not limited to: abdominal, OB-GYN and urological, small parts, musculoskeletal, vascular.

GE Logiq P6 Features and Specifications

Imaging Technology

Speckle Reduction Imaging (SRI): Increase organ visibility and see lesions more clearly with high-definition contrast resolution that suppresses speckle artifact problems while staying true to tissue structure.

CrossXBeam: Increase detail on tissue and borders with real-time spatial compounding acquisition and processing.

Real-time 4D Imaging: Develop volumetric images with multiplayer views of anatomy.

DualBeam: Maintains highest possible frame rates with high line density. Works even in abnormal settings. Increases temporal resolution in fast-flow cardiac and vascular studies.

Harmonics: Increase resolution and cystic clarity with coded harmonics and Phase Inversion Harmonics.

Compatible Ultrasound Probes / Transducers

GE 11L Linear Array Probe
 GE 3S Sector Array Probe
 GE 3SP Phased Array Probe
 GE 4C Curved Array Probe
 GE 4D8C Curved Array 3D 4D Probe
 GE 4D E7C Endocavitary 3D 4D Probe
 GE 5S Sector Array Probe
